01 · BRAND ESSENCE

We sell quiet land, not noise.

Prime Golden Properties is a twelve-year-old family-run real estate house in Tamil Nadu. We do three things, and only three: we sell DTCP-approved plots in Cheyyar Taluk; we build turnkey homes on them at honest per-square-foot rates; and we help long-time landowners resell their plots when their season changes. Three hundred and ten families have signed with us since 2013, and most of them have referred their cousins.

We are quietly relentless. We don't shout.

We don't dress up. We just show up.

— THE FOUNDING TEAM, 2013

THE THREE PILLARS

01

Heritage.

Twelve years, one corridor.

Operating since 2013 from a single back-office in Chennai. Our oldest customers' children are now buying their second plot. Continuity is the moat.

02

Honesty.

What's listed is what you pay.

DTCP approvals, parent documents, EC, and patta — verified up-front. Per-sq-ft construction rates published online. Government charges itemised. No verbal commitments.

03

Locality.

One pocket, run end-to-end.

We work three villages within Cheyyar Taluk. Not thirty. Same team handles plot, build, and resale, so the file you start with is the file you finish with.

02 · COLOUR

The palette, in three roles.

Three colours do the heavy lifting. The rest exist to support them. Stay within these exact hexes — no hue drift, no "close enough."

THE 60 · 30 · 10 RULE

60% · SURFACE

30% · SECONDARY

10% · GOLD

Surface (deep green or cream, depending on the section) covers most of the canvas. Secondary tones do the heavy lifting for text. Gold is a spice — used for moments that demand the eye. Never the wallpaper.

03 · TYPOGRAPHY

Playfair Display.

Our display typeface. We use it for headlines, project names, and the one italicised emotional word per phrase — for example, the legacy in "Land that turns into legacy."

Aa Bb Cc
legacy.

RULES

- Letter-spacing tight at display sizes — track in by ~2 %.
- Italic emphasis only for one word per heading. Never a whole sentence.
- Never set body copy in Playfair. It belongs to titles and quotes.

03 · TYPOGRAPHY

Montserrat.

The voice of every UI surface — body copy, button labels, navigation links, and uppercase micro-labels (eyebrows).

- Display: tight, ~-0.02em.

04 · LOGO

One logo, two surfaces.

The logo is a transparent PNG. The wordmark and tagline live inside it. Never recreate the wordmark in another typeface beside it.

CLEAR-SPACE & MINIMUM SIZE

Clear-space

Leave at least the height of the pin icon as breathing room on every side.

Minimum digital size

60 px tall (icon-only) · 100 px tall (full lockup). Anything smaller will lose the wordmark.

Minimum print size

12 mm tall. Below that, use the icon-only mark.

04 · LOGO

Don't.

Five misuses we see most often. If a layout commits any of these, send it back.

**Don't add a typeset wordmark.**

The PNG already contains "PRIME GOLDEN PROPERTIES." Setting it again in Playfair or Helvetica beside the lockup creates a double-brand.

**Don't stretch or distort.**

Always scale uniformly. Lock the aspect ratio of 1080 × 1350. No squashing for headers.

**Don't recolour.**

Never turn the logo all-white, all-black, or any single colour. The gold and green together are the brand. Pick a surface that contrasts properly instead.

**Don't drop on busy photography.**

If the photo has any green or gold near the logo position, place the logo inside a cream tile first.

**Don't rotate, skew, or add effects.**

No drop shadows on the icon itself (the cream tile carries the shadow). No outlines, glows, embosses, or strokes.

05 · VOICE & TONE

We sound like the family next door.

Twelve years of Tamil real-estate buying isn't sold by slogans. It's sold by sentences that feel familiar.

01 Quietly confident.

We don't shout. We don't use exclamation marks. We let the twelve years speak.

02 Long-form trust over hype.

We explain DTCP. We list every cost. We say "approximately" when we don't know exactly.

03 Words we use.

Plot. Family. Layout. Site visit. Patta. Documentation. Handover. Land.

04 Words we never use.

Asset. Investment opportunity. Synergy. Game-changer. Limited-time-only. Don't miss.

05 Plain Tamil-English okay.

"Rs.4 L plots" is fine. "Rs.400,000 INR" is not. Use lakhs and crores; this is India.

06 · PHOTOGRAPHY

Rural Tamil Nadu, golden hour.

WHAT THE PGP LOOK IS

- 35mm photographic realism, full-frame DSLR feel. No HDR.
- Golden hour, soft warm sienna light, long shadows toward camera.
- Cinematic colour grade — warm midtones, lifted blacks, slight haze.
- South Indian families with faces partial, in profile, or out-of-frame.
- Red-earth ground, palms, tamarind trees, distant Eastern Ghats.
- Tamil vernacular architecture — terracotta tiles, lime-washed walls.
- Detail props: brass key, sale deed, patta, theodolite, red soil.

06 · PHOTOGRAPHY DON'T

Reject on sight.

These are the AI-generated and Western-stock tells. The moment you see one, the image fails the brand. No discussion.

-  **Garbled signage text**
Tiny illegible letters on signs, books, computer screens. AI giveaway #1. If any text in the frame is fake-looking, the whole image is unusable.
-  **Smiling stock model**
Direct-to-camera grin, porcelain teeth, business attire, no context. Looks like a SaaS landing page. Our customers don't smile like that.
-  **Western corporate lighting**
Flat key + softbox fill, no shadows, magazine perfection. Replace with golden-hour directional sun and a soft fill from the sky.
-  **Glass & infinity pool**
Glass-clad high-rises, infinity pools, Singapore skylines. We sell village land. None of that exists in Cheyyar.
-  **English suburban lawn**
Lush green Pinterest-USA grass, picket fences, two-car garage. Wrong climate, wrong palette, wrong country.
-  **Hands-with-too-many-fingers**
Classic generative-AI failure. Hands holding keys / papers must look anatomically right. If a finger is bent backward, kill the image.
-  **Watermarks, logos, captions inside the frame.**
No Shutterstock badge. No "Stock.adobe" tag. No caption box. Clean image only.

08 · GUARD-RAILS

When in doubt, *ask six questions.*

Before any image, page, or piece of copy ships — anyone on the team can stop the launch by failing it through this six-question filter.

- ☐ Does it look like rural Tamil Nadu — not Pinterest USA?
- ☐ Are deep green and warm gold still the dominant duo?
- ☐ Is there any garbled text or AI watermark in the frame? (If yes, kill it.)
- ☐ Could a real PGP customer point at it and say "yes, that's our area"?
- ☐ Did we resist the urge to put a smiling business model in frame?
- ☐ Is the lighting golden hour or just-after-dawn — not midday flat?
